

# This installation can be easy as A, B, C

## (A) - Minimum requirements for TAPIT NOVA computer \*\*\*

- Core 2 Duo processor
- 2 GB of RAM (3 GB for Win 7)
- RS-232 port (if required for PBX interface)
- 250 GB hard disk (C:\ drive should have at least 20 GB of free space)
- Microsoft Win XP Pro SP3 (Win 2003 required for 10+ concurrent users)
- MS Internet Explorer 7
- Monitor resolution 1024 x 768
- Internet access
- DVD drive

\*\*\* if this pc will run other software in addition to Tapit (as long as it doesn't conflict with TAPIT), you will need to "increase" the above requirements.

## (B) - Make sure the following **NECESSARY** items are resolved before you proceed with Step (C).

- Install IIS (**Win 7 / 2008** requires IIS 6 compatibility enabled)
- Install MS .NET Framework 3.5 SP1 - (**Win XP / 2003**)
- Install Windows PowerShell 1.0 - (**Win XP / 2003**)
- Obtain your company's SMTP server configuration information.
- Disable UAC (User Account Control) - (**Win 7 / 2008**).
- Prior to the following installation process please disable ALL anti-virus software you may have running on your PC.

## (C) - The following components will also be installed with TAPIT NOVA from our DVD:

- Adobe PDF Reader
- SQL Server Express (specifically configured for Tapit NOVA). You **MUST** allow it to be installed from this DVD **even** if there's another SQL Server already present on your PC.

**Before calling us for assistance with TAPIT NOVA, please MAKE SURE you are in compliance with ALL of the above.**
