Replay ST
Call Recording Software

Replay is a web-based user interface that integrates with our **Tapit 6 Call Accounting** software. It allows you to password-protect calls, offers over 125 reports, and more!

Replay ST – For connecting with actual phone sets

Replay ST works with most analog and digital telephones. It records phone conversations directly from your phone to your PC, available for retrieval using the **Tapit 6** call accounting system. Our equipment is simple, effective and affordable. **Replay ST** runs on your OC. There is a hardware interface to your phone that connects to a USB port on your PC and a Windows based application that records telephone conversations.

FEATURES:

- Software is easy to install on PC or laptop
- Hardware interface connects your telephone with your computers USB port, enabling recording of telephone conversations directly into an MP3 file
- Recorded files may be store on local or network drive
- Recordings can be emailed as attachments
- Text notes may be added during playback of recordings allowing alternative search capabilities by entire or partial words
- The recorded files can be played or edited with any Windows sound recording application
- Built-in easy auto-archive and auto-backup functionality for recordings
