

Part I: Install Tapit 6 to a New PC

1. First you must install Tapit 6 on the new PC. Refer to the [Read Me First](#) PDF for technical specifications for the new PC.
2. Use the Tapit NOVA Software [download link](#). Please note this download is over 2 gigs.
3. For installation instructions view the [How to Install Tapit 6 Call Accounting Software Installation Manual](#) PDF.

Part II: Moving your Data

1. Once the new copy of Tapit 6 is installed and working on the new PC you will need to move your data. For instructions view the [Moving Tapit 6 to Another Machine](#) PDF.

Part III: Running Tapit 6 Updater

NOTE:

- After moving the Tapit NOVA database, you need to download and run the Tapit 6 Updater on the new PC.
 - Please be sure to disable any Anti-Virus or other security Software before running the Updater.
1. Create a folder called C:\Trisys_Software on the Tapit 6 PC if one does not already exist.
 2. Download Tapit6Updater.exe from the link below. Save this file in the C:\Trisys_Software folder
 3. Right Click on the downloaded file and select Properties. If you see a check box or button labeled Unblock check this box or click the button. Click Apply and OK (it may not be there. If so, skip this step).
 4. Right Click on the downloaded file and select Run as Administrator even if you are logged in as an Administrator.
 5. Allow the Updater to run. This will take a few minutes. Once it is complete you should have the latest version. [Click here](#) to download Tapit 6 Updater.
